EXPERIENCE

Consultant
BDO Canada – Credits & Incentives
Jan. 2025 – Aug. 2025
Toronto, ON
- Draft technical reports for SR&ED and Clean Economy Investment Tax Credits, primarily focusing of software development and engineering projects for eligibility.
- Collaborate with clients across various industries to document technological advancements and challenges in their R&D initiatives.

Undergraduate Teaching Assistant
Sep. 2021 – Present
McMaster University – ENG 1P13, ENG 2PX3, INNOVATE 2Z03, ENGMGNT 4A03
Hamilton, ON
- Guided 80+ undergraduate students through engineering design and programming fundamentals, providing technical mentorship and personalized feedback.
- Evaluated and supervised engineering projects using Autodesk Inventor, Python, and Quanser, helping students develop innovative solutions to real-world problems.

Software Engineer
May 2023 – Aug. 2023
Royal Bank of Canada – Ojo Canada
Toronto, ON
- Applied an agile development methodology to successfully create a React Native application using TypeScript for our front-end development.
- Assisted in the initial setup for push notifications using Firebase Cloud Messaging, enhancing user engagement and communication within the app.
- Effectively integrated our application with Google Analytics to allow for data-driven decision making and providing valuable insights for future improvements.

Software Developer
May 2022 – Aug. 2022
Royal Bank of Canada – Amplify
Toronto, ON
- Collaborated with a cross-functional team of **4** under SmartReno to address challenges of creating a stress-free renovation journey for Canadian homeowners.
- Designed the user interface of our web application using industry standard technologies such as React.js, Axios, and Material UI, ensuring an appealing user experience.
- Conducted in-depth market research, user interviews and competitive analysis to inform the creation of multiple user personas in which our application could be tailored to.

Analyst
May 2021 – Aug. 2021
Grant Thornton - R&D and Government Incentives
Waterloo, ON
- Collaborated closely with a multidisciplinary team of engineers and accountants to assess client's innovated and experimental processes, aimed at resolving technological uncertainties.
- Assisted in documenting and communicating project details during client meetings. Prepared working papers and CRA (Canada Revenue Agency) tax documents, facilitating claims of up to **35%** of the client's annual expenditure in government incentives.

PROJECTS

Paddle Hand Tracker | *Python, OpenCV*
- Python program that utilizes **Open-CV** to supplement athlete training for dragon boat form when paddling with **90%+** accuracy.
- Developed version control skills using **Git** by keeping everything up-to-date and gained further understanding of CI/CD pipelines through this project.
